Pericyte Growth Medium (Ready to use)

ORDERING INFORMATION

Product Name **Pericyte Growth Medium (PC-Growth Medium)**
Catalog No: **cAP-09**
Size: **500ml**
Storage: **4°C (in dark)**

Description

Pericyte growth medium (PC-Growth Medium) is consisted of DMEM (high glucose) and pericyte growth supplements (including fetal bovine serum, growth factors). Due to the nature of those elements, certain level of lot-to-lot variability is unavoidable. Each lot of this product is tested by culturing human pericytes to ensure its full activity and sterility (This product contains antibiotics: penicillin and streptomycin).

Shipping Condition:

Ambient temperature (blue ice, seasonally)

Storage Condition:

The PC-Growth medium should be stored at 4°C. A change in color or appearance of precipitate may indicate deterioration.

Shelf Life: The PC-Growth medium: at least 1 month from the date of receipt under proper storage condition.

Notes for Use of PC-Growth Medium for culturing human pericytes:

1. Before using, transfer just required amount (ml) of PC-Growth Medium for your experiment from the original bottle and prewarm it to 37°C in a water bath or an incubator (Avoid frequent temperature change to the entire bottle of medium).
2. The PC-Growth medium is stable for at least 1 month stored at 4°C. We recommend changing medium every 2 days for regular cell culture.

THIS PRODUCT IS FOR RESEARCH USE ONLY
NOT FOR DIAGNOSTIC OR THERAPEUTIC APPLICATIONS

Caution: Handling human derived products is potentially biohazardous. Although each cell strain is tested negative for HIV, HBV and HCV DNA, diagnostic tests are not necessarily 100% accurate, therefore, proper precautions must be taken to avoid inadvertent exposure. Always wear gloves and safety glasses when working these materials. Never mouth pipette. We recommend following the universal procedures for handling products of human origin as the minimum precaution against contamination.
