Rat monoclonal anti-mouse TNFSF7

ORDERING INFORMATION

Catalog No: mAP-0196
Size: 100 µg
Storage: <-20°C
Immunogen: Mouse recombinant protein TNFSF7
Ig Type: Rat IgG1
Clone: RM0196-9G24
Applications: ELISA & Neutralization

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with mouse **recombinant protein TNFSF7**).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20° for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes mouse TNFSF7 by ELISA. Cross reactivity to other species has not been tested!

Applications:

- | | | | |
|----|----------------|-----|-------------|
| 1. | ELISA | Yes | 1:1000-2000 |
| 2. | Neutralization | Yes | |

For Research Use Only

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only
